

Guadalupe Itinerary

Exciting great white shark diving! 120 individual sharks, and crystal clear water with 125' plus visibility. Calm and sheltered anchorage with diving staged from luxury liveaboard boats. 3 dives per day in submersible cages, plus virtually unlimited diving in surface and suspended cages. This is natural interaction with great white sharks at its very best. October and November is when the "big mamma's" move in. These enormous females are 18-19 feet long with the girth of a Volkswagen!

Day 1: Your trip boards in the evening of the first night. You will meet the group and a crewmember at the Ramada Hotel in San Diego and transfer to the boat by highway coach. After boarding, the ship will get on its way to Guadalupe Island.

Day 2: The boat will arrive at Guadalupe at about dinnertime. Cages will go into the water with the first dives available the following day at 7AM.

Day 3: Cages open at 7AM and remain open until dinner time.

Day 4: Cages open at 7AM and remain open until dinner time.

Day 5: Cages open at 7AM and remain open until dinner time. After dinner, they will be taken out of the water and the boat will make its overnight run back to Ensenada.

Day 6: Arrive into port at about 1:00 PM. You will then board the highway coach and depart for San Diego. You will arrive in San Diego at about 6:00 PM. If you plan to fly home that evening, we suggest no flights are booked before 8:30PM just in case there are any border delays.

YOUR TRIP

Voyages are typically 5 nights/6 days. We do warm-up dives on the first morning after arrival. After that, the ocean is open. The current record is 31.5 hours of cage time over 3 dive days. Cages close at 5 p.m., on the last dive day to get ready for the steam home. We also offer 10 and 15 night Guadalupe combo-trips. The 10-night trip combines diving with the Great White Sharks at Guadalupe Island with scuba diving in the Giant Kelp Forests of the San Benito Islands and other remote islands on the Pacific side of Baja California. The 15-night expedition in November combines Guadalupe and San Benitos with the famous giant mantas and dolphins of Socorro Island.
