Trekking Adventures Papua New Guinea

ABOUT PAPUA NEW GUINEA

Papua New Guinea occupies the eastern half of the rugged tropical island of New Guinea (which it shares with the Indonesian territory of Irian Jaya) as well as numerous smaller islands and atolls in the Pacific. The central part of the island rises into a wide ridge of mountains known as the Highlands, a territory that is so densely forested and topographically forbidding that the island's local people remained isolated from each other for millennia. The coastline is liberally endowed with spectacular coral reefs, giving the country an international reputation for scuba diving. The smaller island groups of Papua New Guinea include the Bismarck Archipelago, New Britain, New Ireland and the North Solomon's. Some of these islands are volcanic, with dramatic mountain ranges, and all are relatively undeveloped.

Nearly 85 percent of the main island is carpeted with tropical rain forest, containing vegetation that has its origins from Asia and Australia. The country is also home to an impressive variety of exotic birds, including virtually all of the known species of Bird's of Paradise, and it is blessed with more kinds of orchids than any other country.

For centuries, the South Pacific has been luring the traveller who searched for excitement, beauty and tranquillity. The exploits of sailors to the South Pacific have been told and re-told, but in telling, there is one large country which is not mentioned, Papua New Guinea.

This huge equatorial island provides a smorgasbord of wonderful things to see and do. The rich wealth of flora and fauna will thrill the nature lover, the strong and vibrant culture which dominates everyday life in Papua New Guinea will fascinate the most seasoned traveller, while the natural warmth and friendliness of the people will capture your heart.

Papua New Guinea's climate is tropical, as one would expect in a country located just south of the Equator. December to March is the wet season, although occasional rain falls year-round. While Port Moresby, the capital, and other towns on the coast are quite hot in the summer months, temperatures are considerably cooler in the Highlands. July, August, and September are the best months for trekking vacations.

Mount Wilhelm Climb

Mount Wilhelm 4509m/14793ft

Mt Wilhelm is the highest mountain in Papua New Guinea and Oceania has rugged peaks with a well formed trail leading to its summit. The ascent crosses diverse and beautiful terrain with open grassland on the slopes and granite predominant in the higher levels. It is not a technical mountain to climb and takes 2 days of physically challenging climbing to ascend. There are no ropes involved or high altitude gear or equipment required. You WILL feel the effects of altitude on Wilhelm. Although we do our very best to have a 100% success rate to the summit, safety is our highest priority. Safety will not be compromised under any circumstances. This mountain lends itself to all age groups and would expect anyone wanting to ascend to be in excellent physical condition.

This has to be one of the most scenically spectacular areas of Papua New Guinea. The terrain is rugged and to see gardens on these steepest of slopes is truly amazing. We trek through three eco systems, tropical, temperate and alpine. You will see amazing wild orchids and trek through a savanna of cycads. If you want to truly experience the highlands of Papua New Guinea this is a must do trek. If you don't want to climb the mountain take the leisurely walk to base camp or you may chose to stay at the Lodge which is a remarkable experience in itself. Meet the family and friends who run the trout farm here and walk around the magnificent garden. All our guides have their favourite places to go in PNG this is Pam Christie's the owner of PNG Trekking Adventures favourite place to go in PNG. The weather is warm during the day but can become very cold in the evenings. On the mountain it can get down to -5 degrees Celsius and taking in the wind chill factor it can get down to -15 degrees Celsius.

Accommodation at Betty Lodge is clean and rustic. The accommodation at Base Camp is very, very basic. You must be very fit to climb the mountain. The summit day is 12-14 hours long. We do not climb the mountain during the wet season. The best months are April through to October.
